Timeline

Maya Chen

Revenue Director

Former Head of Customer Success at OrbitCloud. Maya leads company strategy, partnerships, and enterprise expansion in North America and Europe.

Rafael Ortiz

Chief Executive Officer

Built two B2B SaaS onboarding products from zero to launch. Rafael owns roadmap prioritization, AI answer quality, and product adoption metrics.

Iryna Kovalenko

VP of Product

Scaled outbound and partner sales in three regional markets. Iryna manages pipeline generation, pilots, pricing strategy, and renewal forecasting.

Northstar Assist helps SaaS teams launch customers faster and reduce manual onboarding work.

"Every customer should reach first value in under seven days with a clear, guided path."

“By 2027, Northstar Assist will become the default onboarding copilot for mid-market SaaS teams that need fast deployment, multilingual guidance, and measurable customer adoption.”

Strengths

- Fast implementation in under 14 days.
 - ▪ Strong multilingual knowledge retrieval.
 - ▪ Clear admin controls and analytics dashboard.

Weaknesses

- Limited brand awareness outside SaaS.
 - ▪ Small enterprise sales team.
 - ▪ Dependence on CRM and help-center integrations.

Opportunities

- Growing demand for AI onboarding tools.
 - ▪ Expansion into regulated EU customers.
 - ▪ Partner-led sales through agencies and integrators.

Threats

- Large support suites adding AI modules.
 - ▪ Longer procurement cycles in enterprise.
 - ▪ Rising customer expectations around data residency.

OBJECTIVES

Launch Guided Rollout for pilot customers

Northstar Assist will focus on disciplined growth in Q3 and Q4 2026, with objectives tied to revenue, activation, and customer expansion.

Q3 2026

Reduce median onboarding time from 21 to 10 days

Each objective supports the next stage: stronger pilots create better references, better references improve win rate, and improved win rate unlocks more efficient growth.

Q4 2026

Expand to two new EU markets with local language support

Success will be tracked through product adoption, time-to-value, qualified pipeline, and renewal readiness across pilot and expansion accounts.

Q1 2027

Reach \$4.8M qualified pipeline and 92% gross retention

The four priority objectives below are intentionally specific so they can be used in demos, QA checks, and RAG validation without ambiguity.

Q2 2027

OBJECTIVES

Marketing objectives

- Generate 180 marketing-qualified leads in Q4 2026.
 - ▪ Lift webinar-to-demo conversion from 8% to 13%.
 - ▪ Publish 12 customer education assets by December.
 - ▪ Reduce paid acquisition cost per demo by 15%.

Communication objectives

- Increase brand search volume by 20% by Q1 2027.
 - ▪ Launch one enterprise case study and three pilot stories.
 - ▪ Raise monthly newsletter click-through rate to 4.5%.
 - ▪ Improve internal release communication cadence to weekly.

Business objectives

- Reach \$1.2M new ARR from pilot and expansion deals.
 - ▪ Improve gross retention to 92% and NRR to 118%.
 - ▪ Keep average implementation cost below \$6,500.
 - ▪ Win 14 net-new mid-market accounts before June 2027.

PERSONAS

1

Lena Brooks

Needs and motivations

Needs fast activation, fewer support tickets, and proof that onboarding improves retention.

Pain points

Current onboarding relies on scattered docs and manual follow-ups that do not scale.

Opportunities

Northstar can automate playbooks, surface next steps, and track activation milestones.

2

Marco Silva

Needs and motivations

Wants a repeatable rollout process, clear ownership, and fewer last-minute customer blockers.

Pain points

Implementation work is hard to standardize across customers, regions, and team members.

Opportunities

Northstar can standardize rollout templates and provide progress alerts to stakeholders.

3

Priya Nair

Needs and motivations

Needs self-serve education, multilingual content, and better visibility into article effectiveness.

Pain points

Knowledge content exists, but answers are inconsistent and hard to measure over time.

Opportunities

Northstar can unify knowledge sources and measure answer quality across languages.

PERSONAS

1

Ava Romero

2

Jonas Weber

3

Elena Petrov

4

Victor Okafor

5

Claire Dubois

Needs and motivations

VP Customer Experience who wants a simple executive view of retention, risk, and growth potential.

Needs and motivations

Regional Enablement Lead aiming for reusable launch kits and consistent messaging across markets.

Needs and motivations

IT Security Manager who needs access control, auditability, and clear data handling policies.

Needs and motivations

RevOps Director focused on forecast accuracy, expansion signals, and standardized reporting.

Needs and motivations

Customer Success Manager who wants healthier accounts, faster adoption, and fewer escalations.

Pain Points

Managers lack a clean success score to identify accounts ready for expansion.

Pain Points

Regional teams translate content manually, which delays launches and creates drift.

Pain Points

Security reviews slow down pilots when documentation is incomplete or hard to access.

Pain Points

RevOps data is fragmented, making it hard to connect product usage with renewal risk.

Pain Points

Too many customer questions reach the team after go-live, raising cost-to-serve.

BUSINESS ROADMAP

1

Discover

Validate three design partners and document the baseline onboarding workflow.

● Pilot checklist and success criteria

● Baseline workflow map

● Pilot discovery

2

Build

Ship Guided Rollout and connect CRM, help center, and usage events.

● Beta ready in staging

● Integration bundle

● Build product

3

Enable

Train Sales and CS on demo flow, rollout milestones, and escalation paths.

● Weekly certification complete

● Enablement kit and scripts

● Team enablement

4

Launch

Publish customer stories, ROI calculator, and localized pages for Germany and Spain.

● Launch package live

● Board update

● Demand launch

5

Scale

Improve executive reporting and success scoring for renewal and expansion.

● QBR package in all pilots

● Expansion dashboard

● Scale expansion

BUSINESS ROADMAP

1

Discover

Clarify baseline workflow and customer outcomes.

- Activities include stakeholder interviews, baseline metrics, and process mapping.

- Product, Sales, Customer Success

- Target: 3 pilots signed and baselined by July 31.

2

Build

Ship the first production-ready integration bundle.

- Includes event tracking, admin permissions, and multilingual retrieval tuning.

- Engineering, Data, Product

- Target: answer accuracy above 90% on gold-set queries.

3

Enable

Train internal teams and standardize pilot delivery.

- Includes demo narrative, objection handling, and rollout ownership matrix.

- Revenue, Marketing, CS

4

Launch

Open new markets and prove repeatable demand.

- Includes German and Spanish landing pages plus one video case study.

- Marketing, Localization, Partners

5

Scale

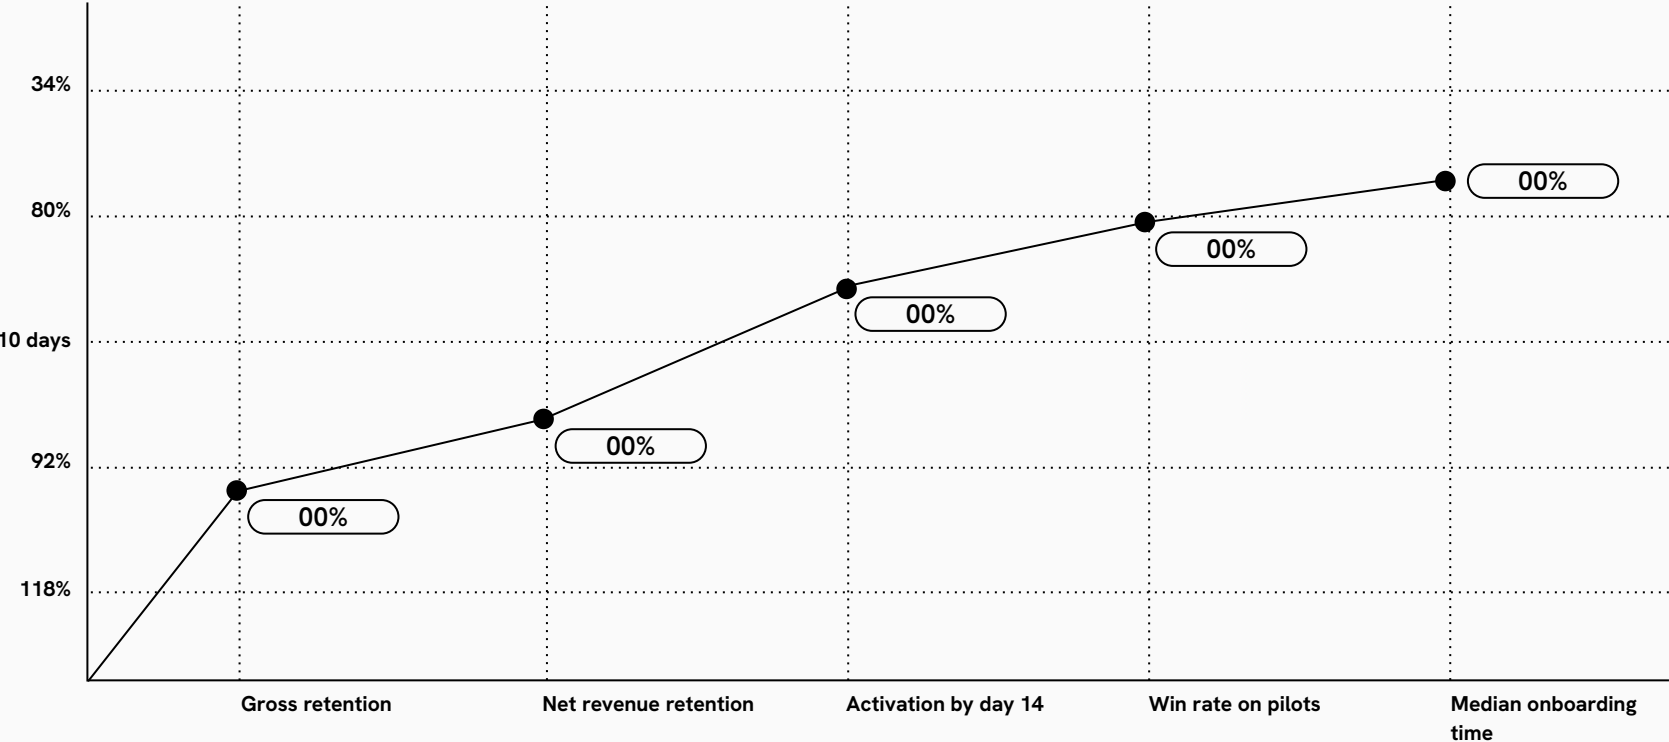

Use health signals to expand and renew accounts.

- Includes executive health score, expansion triggers, and renewal prep notes.

- Leadership, RevOps, CS

- Target: 92% gross retention and 19 expansion-ready accounts.

Projected results

Projected results

54_{days}

Expansion-ready

Gold-set testing keeps quality measurable

61%

Monthly Active Admins

Reduced support tickets from resolved queries

27%

Answer Accuracy

Faster cycles with early document sharing

13%

Article Deflection

Improved conversion via QBR success scores

19

Lead-to-Demo Rate

Adoption confirms internal champion strength

148

Pilot packaging reduces decision friction

91%

Pilot-to-Paid Rate

Webinars drive better product education conversion

22%

Average Deal Cycle

Readiness links usage depth and CS sentiment

Projected results

31%

Sales growth

Sales growth is driven by higher pilot conversion and stronger partner referrals.

\$6.4M

Revenue

Revenue includes \$1.2M new ARR plus expansion in existing pilot accounts.

146%

Return on investment

ROI improves as onboarding labor per account decreases and retention rises.

Projected results

\$180K	Partner pipeline	Average annual savings from reduced manual onboarding effort.
\$24K	Germany pipeline	Expansion pipeline from existing pilot accounts.
\$0.9M	Expansion pipeline	Partner-sourced pipeline from agencies and consultants.
\$1.1M	Spain pipeline	Pipeline expected from Germany launch.
\$0.8M	Annual labor savings	Pipeline expected from Spain launch.
\$1.9M	Avg upsell	Average quarterly upsell value per eligible account.
