SPOTLIGHT

Maya Chen

CEO & Founder

- Maya is the founder and executive sponsor for product reliability. She reviews unresolved queries every Friday and signs off on evaluation metrics before each release.

- Contact
- maya.chen@deckpilot.ai

Make every presentation queryable, reliable, and useful after the meeting ends.

-
- DeckPilot turns PDF, PPT, and PPTX files into an assistant that answers questions with slide references, fast summaries, and reusable knowledge.

OUR MISSION

Turn static presentations into grounded conversations that save time, reduce version confusion, and keep important facts accessible.

- We help sales, enablement, training, and customer success teams reuse what is already inside their decks instead of recreating answers from scratch.

“A presentation should keep working after the meeting. If the content is important enough to present, it should be easy to ask about later.”

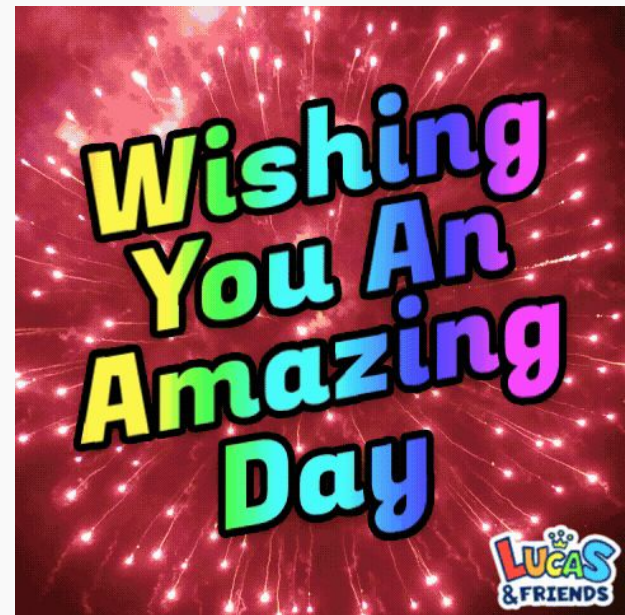

Maya Chen
CEO

“Reliable retrieval matters more than a flashy demo. Users trust the assistant only when it can point back to the right slide.”

Omar Haddad
CTO
